

BRAND GUIDELINES

ColorMyDose™

One Glance. Right Dose. Right Time.

THE BRAND

ColorMyDose™ links every prescription bottle to its organizer compartment through a fixed, universal color code — so the right dose reaches the right time, at a glance.

These guidelines govern the ColorMyDose™ identity in all internal and agency-produced communications. They separate the corporate identity — ink, steel, and paper — from the four functional dose colors, which are reserved exclusively for marking administration time.

Apply the standards as written. Exceptions are reviewed by the brand owner before release.

The wordmark

The primary identifier of the system. The wordmark is set in Libre Franklin ExtraBold and carries the mark — four modules in the functional dose colors, ordered as the dosing day unfolds.

Construction

The mark sits left of the wordmark, aligned to the cap height. Its width equals the wordmark x-height doubled; the gap between mark and wordmark equals two-thirds of one module. Never redraw either element — reproduce from master files only.

The mark

- 1 • **Morning** — top left
- 2 • **Noon** — top right
- 3 • **Evening** — bottom left
- 4 • **Bedtime** — bottom right

Reading order follows the dosing day.

nearby

Mark
App icons and favicons, from 12 px

Clear space

 Clear space on all sides equals one full mark (2 × 2 modules). No type, rules, or graphics may enter this zone.

Minimum size

Lockup — **28 mm** print · **110 px** digital

Mark alone — **4 mm** print · **12 px** digital

Below these sizes the modules lose separation; use the wordmark alone.

Color applications

Positive — full color on Paper. Preferred.

Reversed — full-color mark on Ink.

One-color — all Ink, for single-color print.

One-color reversed — all Paper on Ink.

Misuse

The wordmark is a fixed asset. The alterations below — and any others — are not permitted in any application.

Never recolor the wordmark. Dose colors are functional, not decorative.

Never reorder the modules. The sequence is the dosing day.

Never stretch, condense, or skew. Scale proportionally only.

Never add shadows or effects. The lockup prints flat.

Never place on low-contrast grounds. Use Paper, Mist, or Ink.

Never rotate or realign. The lockup sits horizontal.

CORRECT USE

- Reproduce from supplied master files only
- Reverse on Ink for dark grounds
- Positive on Paper is the preferred application
- Route exceptions to the brand owner before release

Color

Two palettes with two jobs. The corporate palette carries the brand: calm, clinical, credible. The four dose colors are clinical instruments — they appear only to mark administration time, which keeps their meaning unambiguous at the point of care.

Corporate palette

Ink

#1D3A4F

RGB 29 · 58 · 79 · CMYK 63 · 27 · 0 · 69

Primary — text, headlines, reversed grounds

Steel

#56778A

RGB 86 · 119 · 138 · CMYK 38 · 14 · 0 · 46

Secondary — captions, rules, UI chrome

Mist

#EDF2F4

RGB 237 · 242 · 244 · CMYK 3 · 1 · 0 · 4

Ground — panels and tables

Paper

#FFFFFF

RGB 255 · 255 · 255 · CMYK 0 · 0 · 0 · 0

Ground — primary surface

Ink and Steel may be tinted in 20% steps for rules, charts, and backgrounds. No other corporate colors are permitted.

Proportion

Contrast

Aa	Ink on Mist	10.6:1	AAA
Aa	Steel on Paper	4.8:1	AA — body size and larger

The functional dose colors

Four colors, permanently assigned to the four times of day. They appear on prescription labels, stickers, organizer compartments, and schedules — and nowhere else.

 MORNING Yellow	ASSIGNMENT QAM · once daily & BID first dose	VALUES #F5C842 · RGB 245 200 66 CMYK 0 · 18 · 73 · 4 · PMS 143 C	ON-COLOR TEXT Ink · 7.5 : 1
 NOON Red	ASSIGNMENT Noon · midday dose	VALUES #E24B4A · RGB 226 75 74 CMYK 0 · 67 · 67 · 11 · PMS 179 C	ON-COLOR TEXT Paper · 3.9 : 1
 EVENING Green	ASSIGNMENT PM · afternoon / evening dose	VALUES #639922 · RGB 99 153 34 CMYK 35 · 0 · 78 · 40 · PMS 370 C	ON-COLOR TEXT Paper · 3.4 : 1
 BEDTIME Purple	ASSIGNMENT QHS · bedtime & BID second dose	VALUES #7F77DD · RGB 127 119 221 CMYK 43 · 46 · 0 · 13 · PMS 2725 C	ON-COLOR TEXT Paper · 3.8 : 1

RULES OF USE

Production standard — Pantone Solid Coated · ΔE ≤ 2.0 at D50 · match the approved physical sample, not a CMYK build

01 · Fixed assignment. Colors are permanently bound to times of day. Never reassign, swap, or repurpose them.

03 · Never color alone. Every dose color carries its time-of-day symbol and text label. Color supports the label; it never replaces it.

02 · Function only. Dose colors never appear decoratively — not in charts, headings, or corporate communications.

04 · Dual-color for BID. Twice-daily medications carry one split Morning + Bedtime marker on a single label.

Typography

Two typefaces divide the work. Libre Franklin structures — headlines, labels, data, interface. Source Serif 4 explains — long-form text, standards, and counsel.

Libre Franklin

STRUCTURAL

Headlines, section labels, tables, packaging callouts, and interface text. Set tight at display sizes (–2%), open at label sizes (+14%, uppercase).

Regular Medium **SemiBold** **Bold** **ExtraBold**

AaBbCcDdEeFfGgHhIiJjKk 0123456789 mg · mcg · %

Source Serif 4

EDITORIAL

Body copy, guidance, and patient-facing counsel. Italic carries the tagline and pull-quotes. Never used for labels, tables, or interface.

Regular *Italic* **SemiBold** *SemiBold Italic*

AaBbCcDdEeFfGgHhIiJjKk 0123456789

LICENSING

Both typefaces are open source (SIL OFL) and served via Google Fonts — no license cost for internal or agency use, in print or digital.

FALLBACKS

Where webfonts cannot load: Libre Franklin → Helvetica / Arial; Source Serif 4 → Georgia / Times New Roman. Never substitute other typefaces.

Hierarchy in practice

SECTION 02 — COLOR

A universal language of time

Four colors link the prescription bottle to the organizer compartment — assigned once, never repurposed.

The corporate palette

Ink carries text and headlines; Steel supports captions and rules; Mist and Paper ground every layout. Tints of Ink and Steel serve charts and tables.

Fig. 02 — Corporate palette proportions

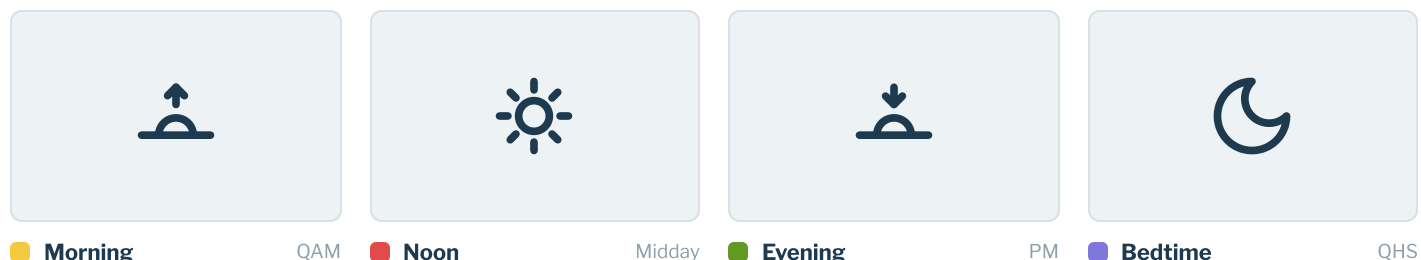

Type scale

STYLE	TYPEFACE	SIZE (PRINT / DIGITAL)	LEADING	TRACKING
Display	Libre Franklin ExtraBold	30 pt / 40 px	1.05	-2%
Heading 1	Libre Franklin Bold	21 pt / 28 px	1.15	-1%
Heading 2	Libre Franklin SemiBold	13.5 pt / 18 px	1.3	0
OVERLINE	Libre Franklin SemiBold	7.5 pt / 10 px	1.4	+14% · caps
Body	Source Serif 4 Regular	12 pt / 16 px	1.5	0
Caption	Libre Franklin Medium	9 pt / 12 px	1.4	+2%

Patient-facing print materials never set body text below 12 pt. Digital interfaces never set body text below 16 px.

The time-of-day symbols

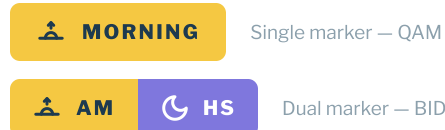

Four symbols pair with the four dose colors so that no marker ever depends on color alone. The sun rises, stands, and sets; the moon closes the day.

Construction

- Drawn on a 24-unit grid with a 2-unit stroke
- Round caps and joins throughout
- Forms derive from the circle and the horizon line
- Arrows indicate rise and set; never redraw or restyle
- Render in Ink on light grounds, Paper on Ink, or on the dose color per the contrast table

Time markers

Minimum reproduction 4 mm / 12 px. A symbol never appears without its text label at the point of use. Reversed labels on Red, Green, and Purple are set bold at 10 pt or larger.
